

## DAM - Campaign job edit

Shaun Gray - 2016-06-28 - [Digital Asset Management \(DAM\)](#)

### AT A GLANCE:

- 01.** Log in to Canopy
  - 02.** Select campaign
  - 03.** Locate required job
  - 04.** Select the job
  - 05.** Edit the job
  - 06.** Update the job information
  - 07.** Select save
  - 08.** Return to campaign view
- 

### **01. Log in to canopy**

Log in to Canopy using your username and password.

### **02. Select campaigns**

From the top menu panel, select campaigns

**Note:** The categories drop down will allow you to select either job or campaign options.

### **03. Locate required Job**

Using the categories search area, locate the required campaign or job.

### **04. Select the job**

Select the required job to open and view

### **05. Edit the job**

From the top right to the screen select the tasks button and select edit from the drop down list.

### **06. Update job information**

Enter any additional job information required (eg: Name, Client Code, Client Reference Number, Description, Dates, Region, Language, Authoriser, Account Manager and Project Manager).

Add or remove job tags as required. **Note:** jobs, when created, will inherit any campaign tags already entered.

Replace Job Thumbnail if required, by selecting the update button. **Note:** this must be a PNG file and must be manually uploaded when creating web jobs.

### **07. Select save**

Select save from the base of the screen

## **08. Return to campaign view**

Use the crumb line at the top of the screen to return to the job or campaign view.

### **ADDITIONAL OPTIONS**

#### **- Add additional make-up files**

Select the make-up files tab on the required job.

**Add files:** allows you to upload new files to the campaign.

Select add files and drag files or a zip into the upload window. Rename the file set upload if required and select save. This will add the files to the campaign.

**Add existing:** allows you to link additional file sets already uploaded to the campaign.

Select add existing file set and locate the file set from the drop down list of campaign make up files. Once selected, select confirm.

The file set will be now added to your job make up files.
