

COLLABRATIVE APPROVAL UPDATES

2016-07-20 - Shaun Gray - KNOWLEDGEWELL

Wellcom are pleased to announce the release of Collaborate version [v1.15.0.727](#)

New Functions:

- Comparing Versions - possibility to swipe separator of the versions in side by side compare and overlay compare
- Version Compare in ProofStudio - Show approval names while comparing
- Custom landing page on account level - You can customize the content of the landing page in the account settings
- Hide completed approvals from dashboard
- Decision information on dashboard missing in Approval Workflow
- Adapt layout to accept decision label on Approval Phasing
- Warning pop-up in ProofStudio when a decision is made and version should be locked after that action
- Lock/Unlock functionalities from Job Details and ProofStudio only by job owner
- Embedded profile is not displayed - File Comparison
- Warning sign should appear near annotation when viewing conditions are changed - File Comparison
- Search in File Comparison Pop-up

Fixed Items:

- White Label option - References in emails are now completely hidden
- Administration module: Plan viewing speed improved
- Users can't be changed for new versions is now fixed
- Collaborators can make changes on a locked version
- Any user can unlock job versions even though they are shared
- External user and Collaborate viewer can make decisions on locked versions
- Collaborators can take decisions although the PDM has made a decision and the approval is locked
- Version number is not displayed correctly
- Background overlay on File Comparison pop-up
- Some corrected typos
- Download pop-up layout issue
- Simulation Profile dropdown closes when moving scrollbar - IE only
- Verification of window location (monitor) wrong for SoftProofing
