Knowledgewell Deployment - Thursday 20th September 2018

2018-09-17 - Shaun Gray - KNOWLEDGEWELL

KNOWLEDGEWELL - ONLINE APPROVAL 3

1. Enhancement, 'Copy annotation UI' -

UI screen when copying a note is not resized correctly and you are unable to select the correct checkbox. We have added enough space between checkboxes so that users can check the relevant box successfully.

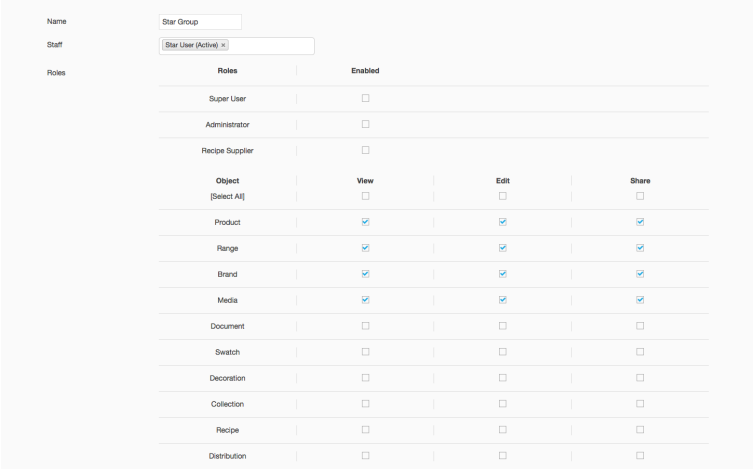

KNOWLEDGEWELL - DIGITAL ASSET MANAGEMENT

1. New Feature, 'Add references to documents' -

Display all references links where documents have been associated with other objects within DAM.

2. Enhancement, 'Group Roles' -

Additional functionality and changes made to 'Group Roles'

3. Enhancement 'Sharing of alternate formats' -

Improved sharing functionality for alternate file formats.

4. Enhancement 'Recipes product matching' -

Adjustments made to search functionality to better user experience when matching to product codes and GTIN.

5. Enhancement 'Refine Search Panel' -

When you scroll in the left-hand panel to access further options the results do not hold, they also scroll. These should not move.

6. Enhancement 'Download button make-up files' -

Changes made to download function in Campaigns/Jobs make-up files.

7. Enhancement 'Recent Content Report' -

An additional column for Categories added to existing CSV download report.

KNOWLEDGEWELL - LOCAL AREA MARKETING

1. New Feature, 'Access Groups' -

Ability to tag a user and associated that tag to a campaign and items within to only show relative content.

2. Enhancement 'Reports' -

The query which was for 'Export Template Data' has been modified. The columns download, views, purchase counts values corrected, the column total count is also added, and the ability to report based on min date, max date in calendars have been added. The store name and store Id have been added to the query, so these new features are covered by the query and previous features.
